## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Martin et al. U.S. Patent No. 6,338,066.

Regarding claims 1-11, Martin teaches specifying a threshold; providing promotions; sampling of customer population based on characteristic of the customers sampled; wherein characteristic is amount spend on a web site, interaction with a web site or purchase made at a web site; optimizing an amount of discount offered in the promotion; optimizing the promotion amount provided to other customers based on the promotion discovered in the sample; storing the data in a database; random sampling based on amount spent by the customer (see abstract, col. 1 line 50 to col. 2 line 18, col. 2 line 43 to col. 3 line 12, col. 3 line 55 to col. 9 line 18).

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lazarus et al. U.S. Patent No. 6,430,539 teaches predictive modeling of consumer financial behavior.
